## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I.* Claims 1-25, 49-59 drawn to a method of treating IBD in an avian subject and pharmaceutical compositions, classified in class 514, subclass 385.
- II. Claims 26-48, drawn to a method of producing active immunity in an avian subject, classified in class 514 , subclass 385.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct methods which require different method steps. In this case, the invention of Group II requires the administration of an IBD vaccine whereas the invention of Group I does not. (Please note that the pharmaceutical compositions claims 49-59 will be examined with method claims 1-25).

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: methods of administering the compounds represented by Formulas I-IV, with specific species set forth in claims 1, 3-12, 14-23; claims 26, 28-37, 39-48; claims 49-59.

Art Unit: 1614

The compounds claimed in these claims are chemically and structurally distinct. Applicant is respectfully requested to elect a single species set forth in the abovementioned claims.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 26 and 49 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1614

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
